

Magic Flower Power shirt

Made by you

What you will need :

- Silk flowers: you can cut them out of a fabric with a cricut maker or just buy them from us. We used 20 flowers on our shirt.
- Plastic snap fasteners
- Pressure pliers
- Shirt or shirt that you like (one that is fitted gives better results than a wide shirt)

There are 3 ways to make flowers :

1. With the cricut maker :

If you're cutting the fabric through a cricut maker, you can use these models, or others you can find on Google Images, or any other shape you like. You can make and use other colors and fabrics. Let your creativity flow. Be original.

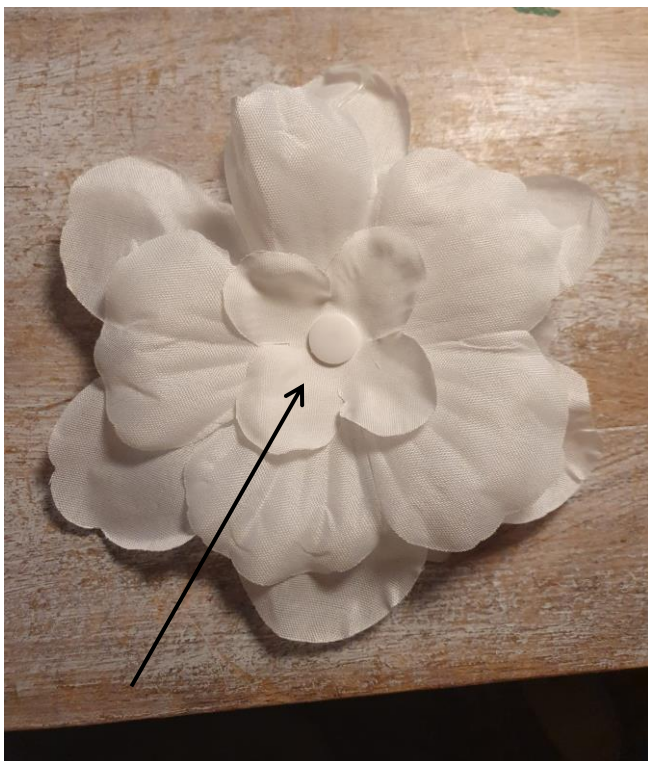

It is important to cut different sizes to obtain beautiful layers.

The minimum number of layers of silk should be 3 or 4 pieces to create some volume for one flower. Our flowers have a diameter of 12cm.

Using a large needle, make a small hole in the middle of the flower and place the layers on top of each other. At this point, you have the push button attached to it.

Make sure you always use the same push button on the right side. The round part should be on top of the flower, as shown in the photo.

For on top of the shirt because it will be clearly visible

Important: Use the female snap button part to make the flower. The male part is printed on the shirt.

First, try some snaps on a piece of fabric, so that you have a good understanding of how to attach the press stud properly. They can be broken by attaching them poorly and can no longer be used

2. Our flowers :

If you don't have a cricutmaker, you can buy made flowers from us in white or pink:

You can easily buy the press buttons online at Amazon, for example with pliers included.

In één verpakking vind je 10 bloemen.

Van elke bloem kun je 2 stuks maken, omdat de bloem 6 lagen heeft. We hebben 1 kleintje toegevoegd aan bloem B, die is opgenomen bij de aankoop van bloemen.

Maak de bloemen los, houd ze goed bij elkaar zodat je het gaatje meteen kunt gebruiken om een drukknoopje aan te bevestigen, zoals op de vorige foto's te zien is.

Add the masculine part of the snap button on top of the shirt.

IMPORTANT: keep a distance of 5cm between the flowers or you will get an overload of flowers on your shirt and is therefore exaggerated. It's okay if you put a press stud in the wrong place. Because of the whole thing, you won't see an extra press stud.

3. Make your own flowers from scratch.

Slice or trim 7 petals per flower.

Thread them together with the base and make a firm knot so that a nice flower is formed. Use a sturdy thread so that you don't tear it apart when the leaves contract.

Cut 2 circles of 3 cm diameter.

Attach a press stud to one of them for the bottom to attach them to your shirt.

HAVE LOTS OF FUN !

Send us pictures of your work !
